Troubleshooting Equipment
with Dead Batteries*

P3 PORTABLE POWER PACK

TOP TECHNICIAN-VALIDATED USE CASES

Move Forklifts Quickly & Safely

"It used to take 2-3 hours to get a forklift to the charger. Now we just bring the P3 over, hook it up, and drive it there."

- No battery? No problem. Instantly power up forklifts dead on arrival.
- Save time on job sites with fast setup and no waiting for charging or spares.
- Keep freight moving by driving lifts on/off semis during delivery or lease returns.

Streamline Fleet Setups

"We used to deliver forklifts then install the batteries on-site. Now we do it all with the P3 before it leaves."

- Configure, test, and deliver forklifts fully programmed and ready.
- Reduce technician visits and avoid extra on-site hookup charges.
- Impress customers with complete, turnkey deliveries.

Performance that Lasts

- Powered two 36V/48V forklifts over two days of shop use—without recharging.
- Unloaded up to 26 pallet jacks on a single charge (real-world use).
- Easily handles 6-7 sit-down 48V trucks per charge with 5 minutes of run time.

READER'S CHOICE • PRODUCTS OF THE YEAR

Troubleshooting Simplified: Truck or Battery?

"Is it the battery or the truck? Hook up the P3 and you know in seconds."

- Eliminate battery variables in diagnostics.
- Test lift truck functionality with a known-good power source.
- Reduce misdiagnosis and wasted hours.

Perfect for Leasing & Receiving

"When lifts return without batteries, dealers are stuck. The P3 lets us load them easily."

- Move lease returns even when OEM batteries are stripped.
- Power new forklifts received without batteries (common in large fleet deployments).
- Avoid downtime waiting for batteries to arrive or charge.

Fleet Ready. Shop Tough. Customer Smart

- Portable and rugged: built for mobile techs and warehouse floors.
- Zero maintenance compared to lead-acid carts—no water, no acid, no spills.
- P3 Unit includes Wall-Mounted Charger in price.

TESTIMONIAL

Field Tested & Approved Solution for Unloading New Equipment & Recovering Dead Equipment

"The P3 took unload time (for new equipment) from 2 hours down to 15 minutes." For recovering dead equipment, "we had an order picker at one of our customers go down in an aisle. When the electrics fail, the brakes lock up, they don't drive, they don't steer. You'd need to have a battery source or a forklift large enough to carry the product to the charger...a long process. Taking the P3 out to our customers took that process down from 4 hours to 15 minutes, saving the customer a tremendous amount of money."
